VISCOSITY & FUEL QUALITY

TriboAmix

Fuel Compatibility & Stability Test

- Testing the compatibility of different fuels
- Testing the stability of fuels
- Oven to dry spot test paper
- Temperature range from ambient to 98°C
- Robust metal housing

TriboAmix – Fuel Compatibility & Stability Test

The TriboAmix device is intended to determine the compatibility and stability of different and single fuels. The latest technology provides an easy to use measuring device to the field engineer.

It is feature-rich, comes in a robust metal housing and is easy to handle. Reliable and repeatable accuracy makes the unit the ideal tool for controlling the condition of the operational fluids on site.

Order No.: 1090
